Company Profile:

Masco History

Masco Steel Industries and Masco Crane & Hoist were formed in 1984 by Dennis Beck and is a family run business. Masco has grown from its modest beginning and works out of a plant in Wetaskiwin, Alberta, Canada. Masco provides manufacturing, service, inspections and operator training for overhead cranes, jib cranes, gantry cranes, monorail systems, hoists & trolleys.

Masco is a CWB Certified Company and in addition to the crane division also specializes in the manufacturing of various structural steel projects such as skid packages, unitizations, pipe racks, stairs and ladders along with a variety of miscellaneous steel projects.

Masco strives to meet and exceed standard Health, Safety & Environmental practices and believes it is critical to the well-being of our staff, clients and the general public. Safety is essential in all aspects of our business. The management and staff of Masco are dedicated to maintaining and always improving the health and safety practices at our company.

Masco is always looking to develop, advance and implement new techniques, technologies and procedures to improve the products and services we supply. Masco strongly believes the success of our company is directly related to our work ethic, dedicated staff, health and safety programs and the industry practices we have put in place. Masco will always ensure that we work safely both at our own location and also at our client's locations. Our goal is to always supply the highest quality product to our valued clients in the safest possible way.

Masco Customers

Masco has built its reputation by providing the highest levels of quality and personal service to its customers. These key elements make up the cornerstone of our organization. Our customers are not only important to us; they are the total reason for our existence. We are dedicated to solving our customer needs and this means listening to what they require and responding accordingly. At Masco we consider no project too big or too small.

Qualifications

Masco holds the following certifications to maintain a healthy and safe working environment:

Manufacturing & Installations:

Masco Crane & Hoist truly sets the standard for excellence in crane manufacturing with an unbeatable combination of safety and operating features. Masco knows that our clients seek the best price and performance ratio and we are confident our products deliver just that. Masco Crane & Hoist is a leader in the design and manufacturing of overhead, jib, monorail and gantry cranes with varied specifications and capacities.

Street Hoists:

Masco Crane & Hoist in partnership with Street Hoist have dedicated 15 years to providing high quality, reliable and safe hoists with advanced global technology. Street Hoist products truly set the standard for excellence with an unbeatable combination of safety and operating features that are found in the heart of every Masco Crane.

Masco knows our clients expect the very best product at the very best price, we are confident that the Street Brand Hoist will meet and exceed those expectations.

If you are seeking the highest levels of reliability and performance with significantly lower maintenance costs look no further. Street technology along with Masco's expertise and commitment will deliver.

Masco Crane & Hoist stocks a wide range of Street wire rope and chain hoists along with many parts to provide you with the highest quality crane and hoist solutions, high standards with minimal wait times.

KITO

SAFE. RELIABLE.

Kito Hoists:

Masco Crane & Hoist is a proud strategic partner and distributor of Kito Products and Components. Masco currently has a wide range of the Kito products to meet your company's needs and requirements.

Masco currently supplies many different styles, voltages, and capacities of Kito hoists and trolleys, along with other quality components offered by Kito.

The difference in Kito products is they are engineered to be smaller, lighter, stronger, and are trusted in extreme conditions.

Kito is proven to stand up over long periods of time to keep you in production.

Kito has earned a reputation for delivering a superior product with greater performance and value.

- Food Grade Hoists
- Hazardous Environment Hoists and Trolleys
- Manual Hoist and Trolleys
- Universal Beam Clamps
- Shackles
- Spreader Bars and Lifting Beams
- Kito Parts and Components

Parts and Service:

As a Western Canadian service and parts provider, Masco Crane & Hoist provides overhead crane service, maintenance and a wide range of parts to our clients across Western Canada and the United States. Masco's service technicians work in a wide range of industries using their knowledge and experience to provide the highest quality of service, keeping cranes in top condition and working efficiently and safely.

Masco service technicians undergo continuous training and development to ensure that maintenance, repair and inspection of your equipment is performed to the highest of standards. Our technicians are trained for all makes and models of cranes and hoists.

Whatever your industry or lifting requirements, Masco Crane & Hoist will develop a maintenance and service plan to meet your needs. Our team provides 24/7 support and expertise, helping to reduce crane downtime and maintenance costs.

Crane Inspections:

Masco Crane Inspections & Preventative Maintenance Programs

Masco Crane & Hoist specializes in crane inspections and provides our customers with a preventative maintenance program that is tailored to our customer's needs and facility requirements.

The scheduled inspections will determine whether your crane usage has caused any safety concerns, addresses crane fatigue, wear, corrosion and other damages and deficiencies.

The inspection and preventative maintenance plan Masco offers ensures operating reliability of the crane by defining the maintenance status of the equipment.

Preventative Crane Maintenance is the cost-effective, time saving and intelligent alternative to reactive repairs.

As well as reducing the likelihood of a breakdown, preventative crane maintenance will keep your cranes in top condition, ensuring they work more efficiently, extending their life and minimizing the risk of expensive downtime.

Masco Crane & Hoist Inspection Highlights:

- Masco will design an inspection and preventative maintenance program to monitor your lifting equipment and facility requirements.
- Masco inspectors pinpoint safety and compliance issues and monitor critical items that result in equipment failure and costly downtime.
- Masco's inspection program follows the most recent provincial and federal legislations and requirements (OH&S Part 6 & CSA B167-08).

- Masco will help maintain and update your Crane Log Book.
- Masco technicians are knowledgeable, qualified and experienced in crane inspections and service.
- Masco will help determine the inspection interval your cranes should be on in accordance with OH&S and CSA (Annual/ Semi-Annual/Quarterly/Special Class).
- Components requiring lubricants are oiled/ greased during the inspection.
- Brakes, emergency systems and safety equipment are inspected and/or tested.
- General operation is evaluated for irregularity and abnormal behavior.
- Final typed reports are provided for our customers on the equipment's condition.
- Copies of inspection reports should be stored on site and in the crane Log Book.
- The customer is made aware of repair items or safety issues at the conclusion of the inspection by our certified technicians.

Structural Steel Fabrication:

Masco Steel Industries is a Canadian Welding Bureau Certified Company ensuring all of our welders and fitters are CWB Certified. Masco can provide in house design and fabrication as well as portable welding services for our customers.

Masco Steel Industries designs, manufactures and installs various beam skids, unitizations and skid packages across Western Canada while providing the highest level of quality control.

We provide the complete fabrication and welding services for each Skid Package we manufacture. Masco can also provide an

Overhead Crane System as part of the complete Skid Package.

Masco also provides our customers with portable welding services across Western Canada.

Structural Steel Projects can include:

- Pipe Racks
- Platforms
- Walkways and Access Platforms
- Stairs and Wheelchair Ramps
- Landfill Wind fences
- On-Site Portable Welding
- Beam Skids
- Unitizations

CRANE TRAINING:

Masco Crane & Hoist has developed an extensive crane operator training course designed to meet your companies needs, safety program and lifting requirements. Masco's Crane operator training course was designed in accordance with Occupational Health and Safety and CSA Standards.

Our course will provide the operators of your cranes with the knowledge and skills to safely perform lifts and operate your cranes safely, efficiently and increase productivity. Crane Training has also proved to decrease damage, defects, equipment repairs to your lifting equipment and decreasing costly breakdowns. With successful completion of the crane course, workers will receive a Certificate of Training that will be valid for 3 years.

Crane Course Highlights:

- Classroom Training and Theory / On Floor Practical Training
- Crane legislation (OH&S – Part 6 /CSA – B167)
- Safe operation of overhead crane, jibs, gantry's, monorails, hoists & trolleys
